

Product Requirements Document: Data Analyst Portfolio Website

Owner: Chinna Obula Reddy

Version: 1.0 (Draft)

Date: 9 October 2026

Status: Ready for design and build

1. Overview

1.1 Purpose

A single-page personal portfolio website that presents Chinna Obula Reddy as a job-ready fresher Data Analyst. It should let a recruiter or hiring manager understand who he is, what he can do, and see proof of his work within about 60 seconds.

1.2 Problem Statement

A resume is limited to one page and cannot show dashboards, depth of projects, or personality. As a fresher, the candidate needs a public, shareable proof-of-work page that differentiates him from other applicants who only send a PDF.

1.3 Product Vision

A clean, modern, blue-themed portfolio that turns raw resume facts into a story: *"I turn raw data into clear, actionable insights."*

1.4 Inspiration and What Is Taken From It

The reference site (a Figma Community "Data Analyst Portfolio Website") is used **only** for visual theme, colour palette, typography, section structure and component styles. **No personal content, photo, text or contact details from the reference are reused.** All content comes from the candidate's resume.

2. Goals and Success Metrics

Goal	Metric	Target
Get interview calls	Recruiter contact via email, phone or LinkedIn	Track clicks on contact links
Showcase work	Clicks on project "View Details" and GitHub	At least 30% of visitors open a project
Resume distribution	"Download Resume" clicks	Tracked as an event
Fast and professional	Lighthouse performance and accessibility	90+ on both
Mobile ready	Fully usable on 360px screens	Pass on real devices

Non-goals (v1): blog, CMS, login, backend, comments, multi-language.

3. Target Users

1. **Recruiters / HR (primary):** Skim for 30–60 seconds. Need skills, experience, certifications and contact details fast.
 2. **Hiring managers / senior analysts:** Want evidence of real analysis: tools used, problem solved, approach, dashboards.
 3. **Referrers and peers on LinkedIn:** Need a link they can quickly share.
-

4. Candidate Profile (Source: Resume)

- **Name:** Chinna Obula Reddy
- **Role target:** Data Analyst (fresher)
- **Phone:** +91-6301480507
- **Email:** chinnaobulareddy66@gmail.com
- **Links:** LinkedIn, GitHub (URLs to be added)
- **Summary:** Data Analyst with internship experience in SQL, Python, Power BI, Tableau and Advanced Excel. Experienced in data cleaning, exploratory analysis, KPI reporting and dashboard development using large transactional datasets.
- **Education:** Bachelor of Commerce (B.Com), S.S.B.N Degree College, graduated 2025, CGPA 9.09 / 10.

- **Experience:** Data Analyst Intern, AI Variant, Jul 2025 – Jan 2026.
- **Projects:** US Airline Performance Delay Analysis 2015 (2026); Bank Loan Analysis (2025).
- **Certifications:** ExcelR Data Analyst Program (6 months); Cisco Data Analytics Essentials.

Positioning note: The candidate has a commerce background plus a 6-month internship. The site should present this as a strength: business understanding combined with technical analytics skills.

5. Scope

In scope (v1)

Single-page, scroll-based static website with sticky navigation, 8 sections, resume download, project cards linking to GitHub, contact links, light/dark or theme toggle, responsive layout.

Out of scope (v1)

CMS, backend, contact form with server storage (a mailto or free form service is optional), blog, analytics dashboards.

6. Information Architecture and Content

Navigation order (mirrors the reference): **Home · About · Education · Experience · Skills · Projects · Certifications · Reach Me**

Note: The reference has a "Passions" section. The resume has no content for it, so it is replaced with **Certifications**. Passions/Interests can be added later if desired.

6.1 Home (Hero)

- Circular profile photo with a blue ring and soft shadow (photo to be supplied).
- Location line with pin icon (city to be confirmed by candidate).
- **Headline:** Hi, I'm Chinna Obula Reddy with the name in primary blue.
- **Subheading:** Data Analyst • Fresher (two-tone: blue and dark slate).
- **Tagline** (from resume summary): *"Transforming raw data into actionable insights using SQL, Python, Power BI, Tableau and Excel."*
- Two CTAs:

- Primary filled button: **Explore My Journey** (smooth-scrolls to About)
- Secondary outline button: **Download Resume** (PDF)
- Animated scroll-down arrow.

6.2 About

- Title: **About <blue>Me</blue>**
- Left column text blocks with icons: **Who I Am, My Mission, Educational Background.**
- Right column: four highlight cards in a 2×2 grid:
 1. **Fresh Graduate** – B.Com, 9.09 CGPA
 2. **Data Analytics** – ExcelR 6-month certification
 3. **Internship** – AI Variant, 6 months
 4. **Projects** – 2 end-to-end projects
- Draft copy (editable): "I'm Chinna Obula Reddy, a B.Com graduate who moved into data analytics and completed a 6-month data analyst internship. I enjoy cleaning messy datasets, finding patterns, and presenting them as clear dashboards that help people make decisions."
- Mission draft: "To turn complex datasets into clear KPIs and insights that support better business decisions."

6.3 Education

- Title: **Educational <blue>Journey</blue>**
- Vertical timeline with cards:
 - **Bachelor of Commerce (B.Com)** · S.S.B.N Degree College · Graduated 2025 · CGPA 9.09 / 10
 - **ExcelR – Data Analyst Program** (6-month certification): SQL, Python, Excel, Power BI, Tableau
 - **Cisco – Data Analytics Essentials**: data analysis, visualization, essential analytics concepts

6.4 Experience

- Title: **Professional <blue>Experience</blue>**
- One large card with a solid blue header: **Data Analyst Intern** · AI Variant · Jul 2025 – Jan 2026.
- Body in two columns:
 - **Key Responsibilities** (from resume):

- Analyzed, cleaned and prepared large datasets using SQL, Excel and Python (Pandas, NumPy), with validation and exploratory analysis to find trends and inconsistencies.
- Built interactive dashboards and reports in Power BI, Tableau and Excel to track KPIs and performance metrics.
- Built and maintained data models and relationships, standardized reporting datasets, and improved workflows to reduce manual data preparation.
 - **Tools Used** as blue pill tags: SQL, Python, Pandas, NumPy, Power BI, Tableau, Excel.
- Optional highlighted box **"Focus"** summarizing the internship in one sentence.

6.5 Skills

- Title: **Technical <blue>Skills</blue>**
- Grid of 3×N cards, each with a circular light-blue icon, name, one-line description and a level indicator:

Skill	Description (from resume)
SQL	Querying, joins, aggregation, analysis on transactional data
Python	Pandas, NumPy; data cleaning and EDA
Power BI	Interactive dashboards, KPI reporting, data modelling
Tableau	Dashboards and visual analytics
Advanced Excel	Pivot Tables, Power Query, VLOOKUP/XLOOKUP, formulas
Data Techniques	Data cleaning, EDA, data modelling, KPI reporting

- **Additional Competencies** row of pills: Analytical Thinking, Stakeholder Communication, Data Storytelling.
- **Recommendation:** The reference uses percentage proficiency bars. For a fresher these self-rated numbers can look arbitrary to recruiters. Preferred approach: use level labels (e.g. *Advanced / Proficient / Working knowledge*) or omit bars. If the candidate prefers the bars, they must be honest and consistent with the resume.

6.6 Projects

- Title: **Featured <blue>Projects</blue>**

- Two-column card grid. Each card: cover image, category tag (top-left pill), icon badge (top-right), title, year, short description, tech pills, **View Details** (outline button) and a GitHub icon button.

Project 1: US Airline Performance Delay Analysis 2015 (2026) · Category: *Aviation Analytics*

Tech: Python, MySQL, Power BI

Description: Analyzed U.S. airline data to uncover trends in flight delays, cancellations and airline performance. Performed data cleaning, transformation and EDA, ran SQL queries on key metrics, and built an interactive Power BI dashboard with KPIs and charts.

Project 2: Bank Loan Analysis (2025) · Category: *Financial Analytics*

Tech: SQL, Power BI, Excel, Tableau

Description: Analyzed bank loan data for trends in loan amounts, borrower profiles, interest rates and loan performance. Cleaned data, handled missing values and outliers, and built dashboards in Excel, Power BI and Tableau. Identified high-risk loan segments and repayment patterns across borrower grade, income verification, home ownership, state and time period.

- **View Details** opens a modal or detail page with: problem, dataset, approach (steps), tools, key insights, dashboard screenshots, GitHub link.
- Layout must accommodate more projects later (grid auto-flows).

6.7 Certifications

- Two cards with icon, title, issuer, short description and a **View Certificate** link (links to be supplied):
 - ExcelR – Data Analyst Program (6 Month Certification)
 - Cisco – Data Analytics Essentials

6.8 Reach Me (Contact)

- Dark navy section with gradient heading **Reach <gradient>Me</gradient>** and small heart/star icons.
 - Glass-style card **Get in Touch** with intro text: "I'm open to fresher Data Analyst roles, collaborations, and conversations about data."
 - Contact tiles: **Email, Phone, LinkedIn, GitHub, Location**.
 - Each tile is clickable (mailto, tel, external links).
 - Footer: © 2026 Chinna Obula Reddy.
-

7. Design Specification (From Reference Screenshots)

7.1 Overall Style

Clean, modern, airy SaaS-style portfolio. White and very light blue backgrounds, generous whitespace, rounded cards with soft shadows, blue as the single dominant accent. The final contact section contrasts with a dark navy gradient.

7.2 Colour Palette (approximate values read from screenshots)

Role	Colour	Hex (approx.)
Primary blue (links, name, accents, buttons)	Royal blue	#2563EB
Bright accent (icon badges, progress, hover)	Blue	#3B82F6
Light blue (icon circles, pills background)	Sky blue	#93C5FD / #BFDDBFE
Page background	Near-white blue tint	#F8FAFF to #EFF6FF (subtle gradient)
Card background	White	#FFFFFF
Heading text	Near-black slate	#0F172A
Body text	Slate grey	#475569
Muted text and borders	Light grey	#94A3B8 / #E2E8F0
Contact section background	Deep navy to indigo gradient	#0B1437 → #1E3A8A
Contact heading accent	Pink to violet gradient	#EC4899 → #8B5CF6

Decorative elements: large translucent light-blue circles and small floating dots in the hero and project areas.

7.3 Typography

- **Font family:** Inter (clean geometric sans-serif as seen in reference). Fallback: system-ui, Segoe UI, sans-serif.
- **Section titles:** very large, light-to-regular weight, two-tone pattern: first word in dark slate, last word in primary blue (e.g. "About **Me**").

- **Hero heading:** extra-large (about 72–80px desktop), "Hi, I'm" in near-black, name in blue.
- **Subtitles:** 20–24px, slate grey, centered.
- **Body:** 16–18px, line-height about 1.7.
- **Card titles:** 20–24px medium weight. **Pills/tags:** 12–14px medium.

7.4 Components

- **Sticky navbar:** white, soft shadow, bold blue name at left, text links in blue, palette/theme icon button at right with blue outline. Active link highlighted on scroll.
- **Buttons:** pill-shaped. Primary = solid blue with white text and icon; secondary = white with blue 2px outline and blue text.
- **Cards:** white, 16–24px radius, 1px light border, soft shadow, hover lift.
- **Icon badges:** circular light-blue background with blue line icon (Lucide-style).
- **Tags/pills:** light-blue fill with blue text (skills), or outlined blue pill (project tech).
- **Timeline:** centered vertical line with blue dots and cards.
- **Floating helper buttons (bottom-right):** dark round buttons (theme/settings and help). Optional; only include if useful.
- **Section background rhythm:** alternate white and light-blue tint.

7.5 Motion

Fade-up on scroll for sections and cards, smooth scrolling, hover lift on cards, animated scroll arrow, subtle floating background circles. Respect `prefers-reduced-motion`.

8. Functional Requirements

ID	Requirement	Priority
F1	Sticky navbar with anchor links and active-section highlighting	Must
F2	Smooth scroll to sections; "Explore My Journey" scrolls to About	Must
F3	"Download Resume" downloads the PDF resume	Must
F4	Project cards with tech tags, GitHub link and View Details	Must
F5	Contact tiles: mailto, tel, LinkedIn, GitHub	Must

ID	Requirement	Priority
F6	Fully responsive: mobile ($\geq 360\text{px}$), tablet, desktop	Must
F7	Mobile hamburger menu	Must
F8	Scroll-reveal animations	Should
F9	Theme toggle (light/dark)	Should
F10	Contact form (via Formspree/EmailJS, no backend)	Could
F11	Dashboard screenshot gallery / embedded Power BI or Tableau Public link per project	Should
F12	Certificate links open in new tab	Should
F13	Back-to-top button	Could

9. Non-Functional Requirements

- **Performance:** Lighthouse 90+; images compressed and in WebP; lazy loading; page under 2 MB; loads in under 3 seconds on 4G.
- **Accessibility:** WCAG AA contrast (check light-blue text on white), alt text on all images, keyboard navigation, visible focus states, semantic headings.
- **SEO:** Title like "Chinna Obula Reddy – Data Analyst Portfolio", meta description, Open Graph image for LinkedIn sharing, sitemap, clean URL.
- **Privacy:** Phone and email are public by design; consider an obfuscated mailto or form to reduce spam.
- **Browser support:** Latest Chrome, Edge, Safari, Firefox; iOS Safari and Android Chrome.
- **Analytics:** Privacy-friendly analytics (Google Analytics or Plausible) tracking resume downloads, project clicks and contact clicks.

10. Recommended Tech Stack

- **Simplest:** HTML, CSS (Tailwind) and vanilla JavaScript.
- **Preferred:** React (Vite) or Next.js + Tailwind CSS + Framer Motion + Lucide icons.
- **Design:** Figma for wireframes before build (optional, as in reference).
- **Hosting:** Vercel, Netlify or GitHub Pages (free), plus a custom domain such as `chinnaobulareddy.dev` or `.in`.
- **Source control:** GitHub repo, which itself doubles as a portfolio item.

11. Content Gaps / Items Needed From the Candidate

1. Professional profile photo (plain background, similar to reference circle crop).
 2. LinkedIn and GitHub URLs; GitHub links for both projects.
 3. Current city/location to show (resume does not list one).
 4. Links to the ExcelR and Cisco certificates and the AI Variant internship letter, if available.
 5. Dashboard screenshots or Tableau Public / Power BI published links for both projects.
 6. **Quantified results** for the internship and projects (for example dataset size, number of KPIs, a key insight such as the airline or loan segment with highest risk). Only add numbers that are true.
 7. Final decision on skill proficiency bars versus level labels.
 8. Optional: interests/passions section content, and a short tagline.
 9. Whether to keep the resume as-is on the site or update it first (resume should match the website exactly).
-

12. Milestones

Phase	Deliverable	Duration
1. Content	Collect photo, links, screenshots, finalize copy	2-3 days
2. Design	Figma wireframe and styled mockup using the palette above	2-3 days
3. Build	Responsive site with all sections	4-5 days
4. QA	Cross-device testing, Lighthouse, accessibility, proofreading	1-2 days
5. Launch	Deploy, connect domain, add to resume and LinkedIn	1 day

13. Risks and Mitigations

Risk	Mitigation
Copying reference text or look too closely	Use only theme, palette, fonts and structure; all copy is original from the resume

Risk	Mitigation
Fresher site looks empty	Add case-study depth and dashboard visuals to each project
Self-rated skill percentages hurt credibility	Use level labels or tie each skill to a project
Website and resume mismatch	Treat the resume as the source of truth and update both together
Slow load from large dashboard images	Compress to WebP, lazy-load

14. Acceptance Criteria

- All 8 sections present and content matches the resume.
- Visual theme (blue palette, Inter font, two-tone headings, rounded cards, navy contact section) matches the reference style.
- Resume downloads correctly; all links work and open correctly.
- Site works on mobile, tablet and desktop with no horizontal scrolling.
- Lighthouse performance and accessibility scores of 90 or higher.
- Published on a public URL and added to the resume and LinkedIn profile.
